Profile

Hello, My name is Mostafa Hassan, and I'm a self-taught software developer passionate about creating web applications. With a focus on front-end development, particularly in React JS, I enjoy turning ideas into functioning applications. I'm always looking for new opportunities to grow my skill set and contribute to successful projects.

Selected Projects

StayHealthy

- Designed and developed a Medical Appointment platform to seamlessly connect patients with doctors for consultations and prescriptions.
 - **Features:** User Authentication, Doctor Listing for Patients, Appointment Booking, Consultation Feedback, Profile Management, and Access to Patient Records.
 - **Technologies:** React, Vite, Express, MongoDB, Figma, Vercel, Railway.

E-commerce Website

- Developed a functional e-commerce website with a responsive design.
 - **Features:** product browsing, shopping cart, secure payment processing, and efficient inventory/order management.
 - **Technologies:** React, Material UI, Commerce.js, Stripe.

YouTube Clone

- Built a YouTube clone with a custom UI.
 - **Features:** video sections, categories, channel pages, and a custom video player with playback control.
 - **Technologies:** React, Material UI.
